in @IRISCC_EU

Climate change is the defining challenge of our generation. Rising temperatures, extreme weather events, and rising sea levels threaten ecosystems, economies, and societies worldwide.

Researchers like you are on the frontline, but fragmented research infrastructures and limited access to facilities and interdisciplinary data hinder your ability to tackle these complex issues.

What If You Could

- Access cutting-edge facilities, data, services and computing tools across Europe, regardless of location?
- Combine resources and expertise from diverse disciplines for a truly comprehensive approach?
- Develop co-created services that directly address your research questions?

**Funded by
the European Union**

What You Get with IRISCC

Transnational & Virtual Access (TA & VA)

Utilise cutting-edge research facilities, data, services and modeling tools across Europe, regardless of location.

Integrated Research Services

Go beyond single-RI offerings. Combine resources and expertise for a comprehensive view.

Co-Created Solutions

Work with IRISCC to develop services that directly address your specific research needs.

Phased Approach

Access to services is continually expanding, with new features and functionalities being added throughout the project.

Introducing IRISCC – Your Game Changer in Climate Change Risk Research

IRISCC (Integrated Research Infrastructure Services for Climate Change Risks) is an EU-funded project designed to empower researchers like you. We break down barriers and unlock the full potential of Europe's research infrastructures, offering you to:

- **Become a Top Climate Risk Researcher:** IRISCC services can propel your research to the forefront by providing access to resources and fostering collaboration across disciplines.
- **Make Breakthrough Discoveries:** Tackle the toughest challenges with a holistic approach, integrating data, services, and expertise for novel research.
- **Forge Pioneering Collaborations:** Break down geographical barriers and connect with other researchers across Europe, sparking innovation.
- **Make a Real-World Impact:** Enable your research to directly inform policy decisions and mitigation strategies, shaping a more sustainable future.

From your Research Ideas to Climate risk research

01. Your Research Idea Takes Shape
Formulate your research question or idea related to climate risk. Whether it's hazards, exposure, or vulnerability, IRISCC has the resources to empower you.

02. Find What You Need
Browse our user-friendly catalogue and discover a wealth of data and services from leading research infrastructures relevant to your research idea.

03. Seamless Access
IRISCC will allow you to:

- **Download Data Directly:** Locate and download the data you need through our Virtual Access (VA).
- **Freely Access Platforms:** Utilise European cutting-edge research platforms and facilities through Transnational Access (TNA) calls.
- **Utilise Data Infrastructure:** Access services, computational resources and virtual research environments enabling you to analyse your data or reproduce your research.

ICOS
Integrated Carbon Observation System

ALTERRI
European Research Infrastructure for Terrestrial Ecosystems

04. Get Funding
Develop your TNA proposal and submit it to IRISCC. If successful, IRISCC will cover your access and travel costs, allowing you to focus on your research.

02. Conduct your Research!
Empowered with the right tools and data, embark on your impactful climate risk research!
