INTEGRATED RESEARCH INFRASTRUCTURE SERVICES FOR CLIMATE CHANGE RISKS

About Us

Climate change presents a complex challenge, demanding a deep understanding of its impacts on human systems, natural environments, and production processes. IRISCC is a powerful consortium of leading European research infrastructures. Our collective goal is to empower society to address and strengthen resilience to climate change risks, ultimately fostering a more sustainable future for Europe.

Users We Serve

- ✓ Researchers
- ✓ Businesses
- ✓ Policymakers
- ✓ Society

Benefits of IRISCC

- Increased Research Capacity
- Improved Understanding of Climate Risks
- Development of New Solutions
- More Effective Climate Policies

Vision

IRISCC envisions a Europe where an in-depth understanding of climate risks empowers societies to thrive in a changing environment.

Mission

We harness the power of research infrastructures to create innovative tools and services for researchers, policymakers, industry and other diverse stakeholders.

Impact

IRISCC will empower researchers and other stakeholders with integrated research and knowledge services, driving effective climate action.

79 Partners

22 Countries

15M Budget

54 Months

What You Get with IRISCC

Transnational & Virtual Access (TA & VA)

Utilise top research facilities, data, services and modeling tools across Europe, regardless of location.

Phased Approach

Access to services is continually expanding, with new features and functionalities being added throughout the project.

Integrated Research Services

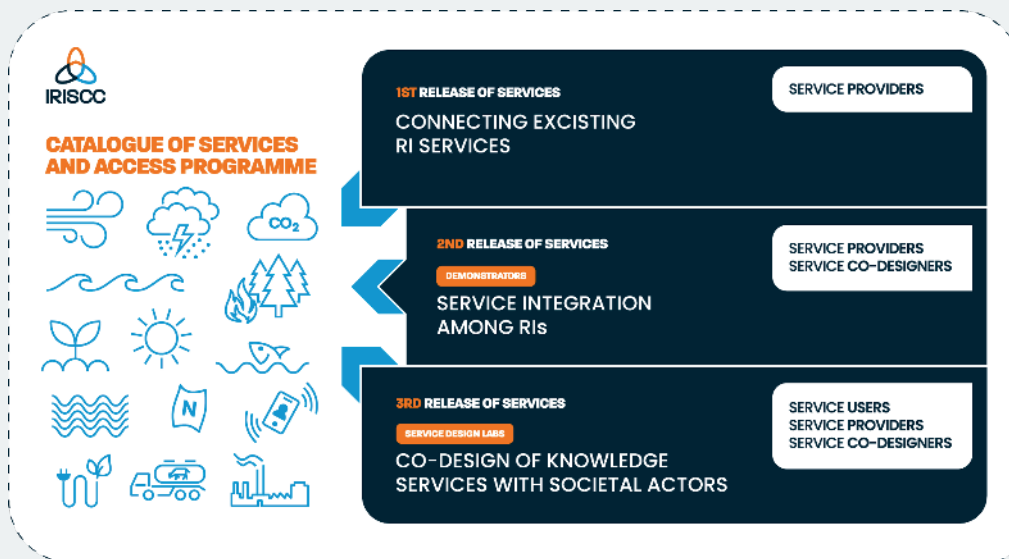

Go beyond single-RI offerings. Combine resources and expertise for a comprehensive view.

Co-Created Solutions

Work with IRISCC to develop services that directly address your specific research needs.
