IRISCC

Access Research Services to Address Climate Risks

The IRISCC Service Catalogue is live. Apply via the First Open Call.

What's IRISCC?

A European project giving researchers free access to top European research infrastructures and their stations, labs, data, tools, and facilities.

What's in the Service Catalogue?

- Monitoring, Experimental and Observational Facilities
- Data Repositories
- Modelling Tools, Virtual Research Environments & Simulation Platforms
- Services from Environmental, Social Science and Digital infrastructures

Who Can Apply?
Researchers & organisations working on climate change, risk mitigation, and adaptation.

What's Included?
- Access to world-class services
- Funding support
- Training opportunities & Expertise

1 | Define Your Idea

You have an idea for Climate Change Risk related research topic. You realize that your own institute does not have all the data or experimental resources needed.

2 | Explore Our Services Catalogue

You search useful data and access to experimental platforms at IRISCC catalogue of services.

- Direct access to open data
- Access to experimental platforms
- Access to digital resources, e.g. computing

Funded by
the European Union

3 | Apply for Access

Writing an access proposal to conduct experiment on one of IRISCC research platforms. Access cost and travel up to 2000 EUR/proposal paid by IRISCC.

4 | Conduct Your Research

Conduct your research and analysis using IRISCC resources. Write impactful papers.

5 | Make an Impact

The research supported by IRISCC is expected to have an impact on the adaptation of our societies towards climate change and mitigation of the risks it conveys.
